

*For immediate release:  
May 8, 2015*

On Thursday, May 7<sup>th</sup>, GMI participated in the ASA Houston OSHA Safety Stand Down for Fall Awareness. This is part of the OSHA national emphasis program for the first two weeks in May, asking employers to stand down and support education on fall awareness and fall prevention. At 11.00AM all over Houston – and for all GMI Houston jobsites – jobs with participating ASA members were under a 15 minute stand down meeting on Fall Awareness and Fall Protection.

Our superintendents at the jobsites conducted or supervised a meeting specific to each of our jobs on the fall hazards present and the control measures GMI employees are taking to prevent injury. Special posters from OSHA were provided for posting on each job as a visual reminder of this day, and the need to stay focused on fall protection.

At the end of the day GMI provided an accounting of our participation to our local ASA chapter office know who participated.
